5/3/2016	<p>As we near the end of FY 2016 it has come to our attention that some agencies may not be aware of the process to clear invoices from the Paymode re-process table that are no longer needed. DFA/OFM has the ability to delete invoices from this table upon request by the agency.</p> <p>Please review your invoices on ZFAP_PM_INV_DIS and determine what has already been paid and what remains outstanding. For invoices that have already been paid, send a list to Chanel.Cain@dfa.ms.gov and Greg.Ramsey@dfa.ms.gov requesting deletion. Make sure to include the transaction ID and the vendor name when submitting the request. Agencies will need to use the Paymode Inbound Invoice Re-process job aid to re-process a Paymode direct invoice which has failed using transaction ZFAP_PM_INV_ENTER. If your agency has not reviewed the table before and has a large number of invoices, we would suggest exporting to excel for determining what has been paid. 7/1/2015	<p>There is a new method of paying invoices on GRANTOR claims. During the lapse period of July and August, grantor agencies will be able to choose which budget year the claim will be applied. In order for MAGIC to separate each payment and charge them to different budget years and allotment periods, some additional date management will need to be done on the claim. When creating a claim on behalf of the user, or when processing a claim sent in by the user, the start date of the claim will need to correspond to the desired budget year. The expense date on each line item will also need to be changed to reflect this date. No other dates will need to be adjusted. For example: If you get a claim in on July 13th and want to pay it with prior year funds, you will change the start date on the claim to 6/30/2015. This will set the budget period on the invoice and payment document to 2015-A2. If you would like to pay it with the new year funds, set the start date to the current date so the budget period on the invoice and payment document will be set to 2016-A1. The new invoicing program uses this date to sort the payments. This date field should be checked on every claim to ensure proper posting of Grantor claims.</p>

As year-end is approaching, it is important that agencies start to correct Good Receipt balances. Ordering Services using Material Line Item Type

New changes in MAGIC will eliminate “Services” as a purchase order line “Item Type.” Services will be purchased using “Material” as the line “Item Type.” Buyers can still use service based product categories.

Below is a screenshot of the change:

Note: Only Material and Limit options are available for Item Type.

Once “Material” is selected for the Item Type, agencies can follow the same steps as normal to complete the purchase order.

In order to remove the requirement for a Goods Receipt, follow the steps below:

1. Click on the **Related Documents** tab.
2. Navigate down until you see **Document Control** (First Section).
3. Uncheck ☒ **Goods Receipt / Confirmation of Performance of Service**

Note: Due to this change, service entry sheets (ML81N) will not be used. Instead, users will complete a Goods Receipt (MIGO).

7/29/2015	<p>The following enhancements have been made to the ZFI_CASH_RPT.</p> <ol style="list-style-type: none"> 1. Posting Period selection option now supports “From” and “To” periods. Previously, the report provided YTD totals through the single period selected. Users can now execute the report for a single period (e.g., period 3), a combination of periods (e.g., periods 2 and 4), or a range of periods (e.g., 1-5). To obtain YTD totals, execute the report from period 1 through the current period. Due to this change, the “Current Period Amount” column was removed from the report. 2. The revenue report now includes Functional Area, Funds Center, Funded Program, Grant, Object Type and Number, Item Text and other fields previously available only on the expenditure report. These new fields are available for most documents with the exception of DZ (Customer Payment) and ZQ (Y/E Cash Transfer) document types. Please note that the Material Number is not yet available on the revenue report. 3. Agencies will no longer be able to save their own report layouts as the “default” layout for the report. <p>Please review the updated ZFI_CASH_RPT Work Instructions for additional information.</p>
